Munich, 06/05/2014

ESE World and Royal Dutch Bammens Sign Exclusive Partnership Agreement

ESE World B.V., Europe's leading manufacturer of temporary storage solutions for waste, and Royal Dutch Bammens B.V., European market leader in Underground Waste Systems, today announced a new phase in their established relationship. Both companies will work together on an exclusive basis in the future.

On occasion of IFAT 2014 in Munich ESE's CEO René P.M. Wolfkamp and Bammens' Managing Director Maarten Durville tonight signed an agreement declaring a close and exclusive cooperation in the market segment Underground Waste Systems Europe-wide.

At the ESE IFAT booth René Wolfkamp explained that in joining forces both parties will bring their best competence and expertise: Bammens' development and production expertise and ESE's sales strength worldwide and its innovative development skills will enable both companies to strengthen their position in the growing markets of Underground Waste Systems and to even better meet the requirements of their international customers.

"We are very much looking forward to this opportunity to combine forces with our partner ESE", said Maarten Durville. "The field of Underground Waste Systems is still in development. Together we can bring more meaningful innovations to our customers".

PWS, CITEC and MULTICOM are part of the ESE World.

ESE World B.V. is Europe's leading manufacturer of temporary storage solutions for waste. ESE World provides customers with the most efficient systems by combining over 75 years of experience with latest technical know-how.

Its product portfolio includes a broad range of 2-wheel and 4-wheel waste containers, pre-sorting systems, collection banks and innovative underground waste collection systems. The company also provides logistics services such as the installation of container parks and the management of container data on behalf of municipalities. Its products provide municipalities and waste service companies across Europe with systems which facilitate hygienic and efficient collection and also drive the recycling of waste.

Royal Dutch Bammens B.V., founded 1850, provides solutions for domestic waste, litter and company waste. Our steel litter bins, wheelie bins and Collectors play an important, yet often unnoticed part in public areas and companies. The products are both well-known and loved because they have been developed taking into account user-friendliness and collector as well as optimum safety and high durability.

Bammens is a Dutch company, based in Maarssen. Development, production, installation and maintenance all take place under one roof. We are the market leader in the Benelux with solutions for aboveground and (semi-) subterranean waste collection. We export to nearly all countries in Europe.

Royal Dutch Bammens: Smart meets Solid
